DICTATOR

DOOR INTERLOCK CONTROL SYSTEM

MODULAR & FLEXIBLE SYSTEM THAT REQUIRES
NO PROGRAMMING KNOWLEDGE

DICTATOR INTERLOCK CONTROL SYSTEMS

Easy installation – also for retrofitting

Can be used for simple to complex interlocks

Flexible adaptation thanks to modular system

Integration into complex building control systems possible

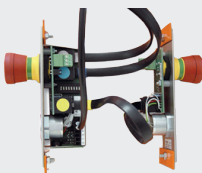

Approved for doors in emergency exits

Quick and easy installation with no programming requirements

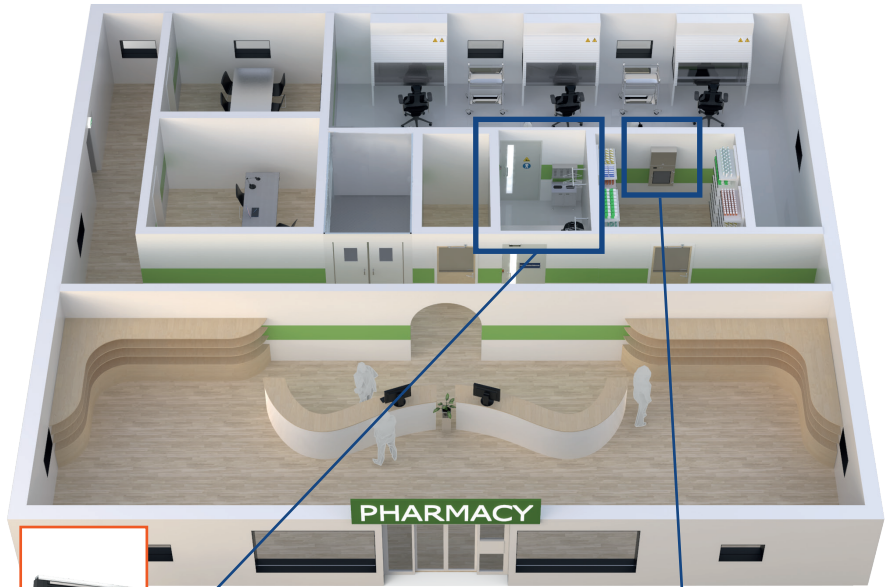

The dependencies of the doors are set using simple DIP switches. On-site adaptation to different conditions is easily possible at any time by trained personnel (without the need for any IT knowledge).

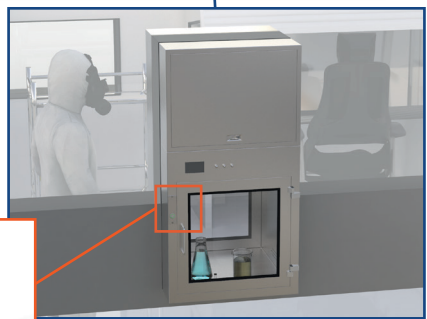

All internal system components are completely pluggable. The cables as well as the corresponding sockets are clearly labeled in color, so that incorrect connection is practically impossible.

APPLICATION EXAMPLE: PHARMACY

PERSONNEL LOCK

- Consists of control terminal and operating terminals (with/without emergency open), distribution box, pre-assembled connecting cables and electrical locking elements
- Many special functions can be implemented
- Control and emergency exit possible from the inside

MATERIAL LOCK

- Cost-effective solution due to the smaller component scope
- Terminal can be operated in stand-alone mode (one-sided operation)

Detailed information can be found at www.dictator.com > Door interlock systems
